Objectives:

- **Review** the clinical heterogeneity of MPS II to identify how phenotype and timing of treatment initiation influence somatic outcomes and long-term care needs
- **Evaluate** real-world registry data to assess long-term treatment outcomes, biochemical responses, and patient-reported impacts across disease phenotypes
- **Summarize** the global evidence base on efficacy and safety in MPS II treatment to contextualize registry findings and highlight persisting unmet needs in disease management

This Satellite Symposium is not part of the official WORLD*Symposium*™ program, and WORLD*Symposium*™ does not approve or endorse any commercial products or services discussed during the Satellite Symposium or offered for sale by the corporate supporter of the Satellite Symposium. This Satellite Symposium is not approved for CE by WORLD*Symposium*™ or any other entity. Eligibility: Registration for WORLD*Symposium*™ 2026 and an official WORLD*Symposium*™ badge are required to attend this satellite symposium.

Code: VV-MEDMAT-130225 | Preparation Date: December 2025.
This symposium is initiated, organized and funded by Takeda.
Please be advised that this symposium is a non-CME event. For healthcare professionals only.
